I benefit from listening to XM Satellite Radio and its traffic and weather channels. I have a satellite radio in my home and my car and was very happy when the traffic and weather channels started. Now I can get that information in a timely fashion instead of having to wait till a local channel gets around to it. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I want and deserve.
